Buffalo Bill Tomorrow.

Parents owe it a duty to their children's thirst for knowledge to have them see the Wild West and Far East. This combination of two exhibitions is one of the best opportunities to gratify their desires. There are very excellent reasons why they should be given a chance to attend this remarkable, elevating, instructive and historical combinations as this visit marks Col. W. F. Cody's, Buffalo Bill, positive farewell.

If there was as much "horse sense" in some of the leaders of thought and propounders of wisdom as there is in Buffalo Bill's Wild West and Pawnee Bill's Far East there would be a good deal less "bucking" in prosperity's parade. Coming tomorrow.

Odd Marriage Notices.

Here are some quaint old time marriage notices that have been dug up by the Springfield Union:

In Bozrah, August, 1819, Mr. John Bate of Williamstown, Mass., to Miss Mary Ann Bass of the former place, after a courtship of one hour.

Is not this angling well, I ask, Such tender bait to take? He caught in one small hour a Bass. The Bass, though, caught the Bate.

Married, at Bridgewater, Dec. 18, 1788, Captain Thomas Baxter of Quincy, aged sixty-six, to Miss Whitman of the former place, aged fifty-eight years, after a long and tedious courtship of forty-eight years, which they both sustained with uncommon fortitude.

In Boston, April, 1821, by the Rev. William Sabine, Joseph Willcutt to Miss Susan Whitmarsh, after a tedious courtship of thirteen days, and but thirty-five days after the death of his former wife. The best way, it seems, a deep sorrow to another. For the loss of a wife is to marry another.

Heatstroke and Sunstroke.

Heatstroke and sunstroke are terms usually applied indifferently to either of two quite distinct conditions, to each of which only one of the names properly applies. Heatstroke, as its name implies, is a condition caused by the action of excessive heat, either the torrid heat of summer or the artificial heat of a foundry, a furnace, the stove-hole of a steamship, etc. It occurs with almost as great frequency at night as in the day, and its victims may be overcome on a cloudy day or without having ventured from their homes. The other form, properly called sunstroke, is due to the direct action of the sun—probably of its ultra violet or chemical rays rather than of its heat rays. Only those who have been long exposed to the direct rays of the sun, such as soldiers on the march, harvesters, ball players, etc., are the subjects of true sunstroke.—Dr. T. L. Stedman in Good Housekeeping.

Responsive Flowers.

Karlstrom says flowers have understanding and know when persons care for them. He says they respond to a loving touch and to a caress. The Swedish collector touches flowers affectionately as he walks through his greenhouse and insists they have a language for those who understand. He points to a flower with drooping head and says it is calling for water. In different ways, he explains, flowers ask for light, warmth, sunshine, and when satisfied the flowers lift up their heads buoyantly and express the pure joy of being. Karlstrom advises the study of flowers through magnifying glasses, saying their beauty is not half appreciated otherwise. A flower under the glass, he asserts, reveals remarkable beauty and if taken to pieces discloses wonders never appreciated.—New York Press.

A Sensitive Horse.

Harsh treatment, though it stop short of inflicting physical pain, keeps a nervous horse in a state of misery. A single blow may be enough to spoil a racer. Daniel Lambert, founder of the Lambert branch of the Morgan family, was thought as a three-year-old to be the fastest trotting stallion of his day. He was a very handsome, stylish, intelligent horse and also extremely sensitive. His driver, Dan Mace, though one of the best reinsmen in America, once made the mistake, through ill temper or bad judgment, of giving Daniel Lambert a severe cut with the whip, and that single blow put an end to his usefulness as a trotter. He became wild and ungovernable in harness and remained so for the rest of his life.
